SHRUTI BHIMRAJKA

FULL STACK AI DEVELOPER | ReactJS • FastAPI • Python

Rajasthan, India | +91 7220096989 | shrutibhimrajka1999@gmail.com | LinkedIn | GitHub

PROFILE SUMMARY

Full Stack AI Developer with industry experience building **end-to-end AI-powered applications** using **ReactJS, Next.js (frontend) and FastAPI, Python (backend)**. Hands-on expertise in **LLM Integration, RAG Pipelines, Prompt Engineering, AI Agent Development**, and integrating **OpenAI APIs, AssemblyAI, Databricks** into scalable web applications. Delivered AI-powered solutions for enterprise clients including **HDFC, Miral, and Mankind**.

TECHNICAL SKILLS

AI & ML: LLM Integration, Prompt Engineering, RAG (Retrieval-Augmented Generation), AI Agent Development, OpenAI APIs, Generative AI, AssemblyAI, LangDetect, Gradio, Databricks (Pipelines, Jobs, Apps)
Frontend: ReactJS, Next.js, JavaScript (ES6+), TypeScript, React Hooks, Custom Hooks, Redux Toolkit, Context API, ReactFlow, Canvas API, Tailwind CSS, WebSockets, Responsive Design
Backend: FastAPI (Python), REST API Development, WebSockets, JSON, MongoDB
Tools: Git, GitHub, Azure DevOps (CI/CD), Postman, Webpack, Vite, Agile/Scrum, Figma, Visio

EXPERIENCE

Software Engineer — Celebal Technologies | Oct 2024 – Present

- **Built end-to-end AI-powered applications** using **ReactJS/Next.js** on the frontend and **FastAPI (Python)** on the backend, integrating **LLM outputs, RAG pipelines**, and **AI agent workflows**.
- **Integrated Databricks pipelines and jobs** into frontend applications, enabling **real-time data-driven AI experiences** for enterprise clients.
- **Applied Prompt Engineering** to optimize **LLM and Generative AI** model outputs, improving response accuracy and automating enterprise workflows.
- **Developed canvas-based annotation systems** and **ReactFlow AI pipeline visualization interfaces** for data extraction and workflow automation across **5+ enterprise projects**.
- **Integrated WebSocket-based real-time dashboards** applying **system design principles** for concurrent connection handling and live AI data streaming.
- **Managed state using Redux Toolkit & Context API**; deployed via **Azure DevOps CI/CD** within **Agile/Scrum** sprints.
- **Conducted code reviews and mentored junior developers** on **React best practices** and full-stack AI integration patterns.

Associate Software Engineer — Ranosys Technologies | Jun 2021 – Oct 2021

- **Developed responsive web applications** using **ReactJS, JavaScript (ES6+), HTML5, and CSS3** with **REST API** integration for dynamic data handling.
- Participated in full **software development lifecycle** within **Agile** teams — analysis, design, development, testing, and deployment.

Career Break – Competitive Exam Preparation (UPSC) — Oct 2021 – Sep 2024

- Pursued full-time **UPSC Civil Services Examination** preparation, developing strong analytical thinking and research skills while upskilling in **ReactJS, Python, and AI tools**.

EDUCATION

B.Tech – Computer Science Engineering (2017 – 2021)
Rajasthan Technical University, Rajasthan

TECHNICAL PROJECTS

LinguaBot – AI-Powered Real-Time Voice Translation App | ReactJS • FastAPI • Python • AssemblyAI

- **Built a full-stack AI application** using **ReactJS** (frontend) and **FastAPI (Python)** (backend) enabling in-browser voice recording with **automatic language detection, speech-to-text**, and **real-time translation**.
- Integrated **AssemblyAI** for speech recognition, **LangDetect** for language detection, and **Google Translator** — designing an optimized **async API pipeline** delivering results within seconds.
- Strengthened expertise in **AI API integration, audio processing, FastAPI backend development**, and building production-ready **full-stack AI applications**.

Document Annotation Platform | ReactJS • Canvas API • FastAPI • REST API

- **Built a ReactJS canvas-based annotation platform** with **drag-and-resize bounding boxes**, dynamic canvas rendering, and **FastAPI backend integration** for structured AI data extraction workflows.
- Implemented **Custom Hooks and Context API** for annotation state management and integrated **REST APIs** for document processing, metadata handling, and annotation persistence.

Workflow Visualization & AI Pipeline System | ReactJS • ReactFlow • WebSockets

- **Developed ReactFlow-based interactive AI pipeline visualization** with custom node types, real-time workflow state monitoring via **WebSockets**, and **memoization/virtualization** for 100+ node graphs.
